About Me

Product Manager and former PayPal product engineer with **5+ years of experience building data-driven platforms and AI-enabled products**. Led development of an agribusiness workflow platform improving operational productivity by **40%**, and shipped merchant product features at PayPal that increased engagement by **18%**. Experienced in **product discovery, MVP development, and analytics-driven iteration**.

Skills

Product Strategy, Product Roadmapping, Customer Discovery, MVP Development, Product Analytics, Experimentation, OKRs, Agile/Scrum, SQL, Python, API Integrations, System Design, Data Pipelines, LLM Applications, AI Product Development, Figma, Jira, Supabase, Next.js, Vercel, Streamlit

Professional Experience

Product Owner

G2 Organic Products (Agritech Platform)
2024 – Present

- Led the end-to-end development of a **multi-agent agribusiness workflow platform**, conducting usability testing with **15 farmers** and iterating on MVP releases, improving operator productivity by **40% within 3 months**.
 - Built **Python and Supabase-powered analytics dashboards** integrated with **Power BI and Excel**, enabling real-time tracking of operational workflows and identification of inventory and distribution bottlenecks.
 - Designed a **workflow orchestration system** integrating **WhatsApp API** for farmer communication, inventory tracking, dispatch coordination, and field reporting, reducing manual coordination across operational tasks.
 - Partnered with freelancers and government-linked stakeholders to deploy the platform across operational teams, achieving **80% adoption among 20+ operators during the first deployment cycle**.
-

Software Engineer (Product)

PayPal
2019 – 2024

- Launched a **merchant-facing AI-powered offer recommendation feature**, collaborating with ML engineers on recommendation models and increasing merchant offer adoption by **18%**.
 - Redesigned the **merchant onboarding experience**, running **A/B experiments and behavioral funnel analysis** to improve new user activation by **15%**.
 - Built **SQL and BigQuery-driven product analytics dashboards**, enabling **9+ product managers** to track OKRs, monitor feature performance, and prioritize roadmap decisions.
 - Partnered with engineering, product, and ML teams to resolve platform constraints using Jira and CI/CD pipelines, accelerating delivery of merchant-facing product features and shortening release cycles across multiple releases.
-

Software Engineer

Donato Technologies
2018 – 2019

- Built internal QA automation tooling that **reduced sprint testing cycles by 25% and accelerated bug feedback loops**, enabling faster feature releases.
 - Developed **AI/NLP-powered eCommerce chat assistant** that automated common customer queries and **reduced manual support workload by 16%**.
-

Projects

AI Insight Journal (Live MVP)

Designed an **AI-powered journaling platform** that converts unstructured reflections into structured emotional insights using deterministic aggregation and LLM-based interpretation.

Tech: OpenAI APIs, Supabase, SQL, [Next.js](#), Vercel, Figma

Meal Planning Optimization System

Designed a **multi-agent AI architecture** that generates personalized meal plans optimized for nutrition, cost, and time constraints.

Tech: OpenAI APIs, SQL, System Design, Streamlit, Figma

Education

MBA in Marketing – IMT Ghaziabad (2023)

MSc in Engineering – Washington State University (2018)

B.Tech in Engineering – Indian Institute of Technology Dhanbad (2012)
